PROFESSIONAL PROFILE

A software engineering graduate, driven by a strong aspiration for academic excellence, possesses proficiency in programming, networking, web development, and database management. My ability to methodically accomplish assignments and achieve goals was developed through collaborative projects.

CORE SKILLS HIGHLIGHTS

- **Teamworking Skills:** Working in groups while studying at university has improved my teamworking. This skill taught me how to help and support each other and ensure effective communication.
- **Adaptability:** As technology improves and grows in this fast-paced world, I possess the ability to swiftly adapt to new tools and methodologies, ensuring project success. This flexibility allows me to adjust to changing deadlines and challenges, facilitating my continuous growth and development.
- **Problem Solving:** My ability to think analytically and tackle problems has improved because of the volume of coursework assigned and the learning of multiple modules with challenging content. I was able to think more analytically and consistently seek out useful ideas.
- **Communication:** Throughout my university journey, I've honed this skill by engaging with diverse peers, participating in group discussions, and collaborating effectively in project meetings.
- **Leadership skill:** Group work for various projects throughout my university journey as a member and leader helped me gain experience in how a team operates. Leading a group, assigning tasks based on people's abilities, maintaining a friendly environment and ensuring workflow continuity have significantly improved this quality.

EDUCATION

BSc (Hons) Software Engineering, 2:2
Nottingham Trent University, Nottingham, UK | September 2021 – July 2024
- 1st year result – 2:1
- 2nd year result – 2:2
- 3rd year result – 2:2

Key Modules:

- **Info & Database Engineering:** Acquired knowledge in the creation and development of databases and developed proficiency in the management, maintenance, and enhancement of existing database systems.
- **System Analysis and Design:** Composed project documentation that portrays the project in a user-accessible manner, facilitating its presentation to relevant stakeholders.
- **Internet Application Programming:** Learned about the theoretical foundations and practical skills essential for proficiently designing and implementing internet-based applications and web designing.

OCR Level 3 Cambridge Technical Extended Diploma IT
Gateway College, Leicester, UK | July 2021
- DDD

OCR Level 3 Cambridge Technical Foundation Diploma IT
Gateway College, Leicester, UK | July 2020

- DD

Beaumont Leys School, Leicester, UK | August 2019
- 9 GCSEs grades B – C including English and Maths

WORK EXPERIENCE

Syncreon Technology, Hinckley, UK | August 2022 – September 2022
Warehouse Operative
- Gained hands-on experience in warehouse operations, contributing to efficient logistics and inventory management.

- Developed an understanding of supply chain processes and the importance of accuracy in a fast-paced environment.

Bleckmann Fashion & Lifestyle Logistics, Lutterworth, UK | May 2022 – July 2022

Returns Department
- Gained experience in managing the JDA WMS database while working in the returns department. This opportunity allowed me to understand the intricacies of database management firsthand, enhancing my skill set in this field.
- I took responsibility for teaching new employees, which enhanced my abilities in effective communication. This experience not only helped me sharpen my communication skills but also deepened my understanding of the onboarding process.
